

Fixtures FI GS

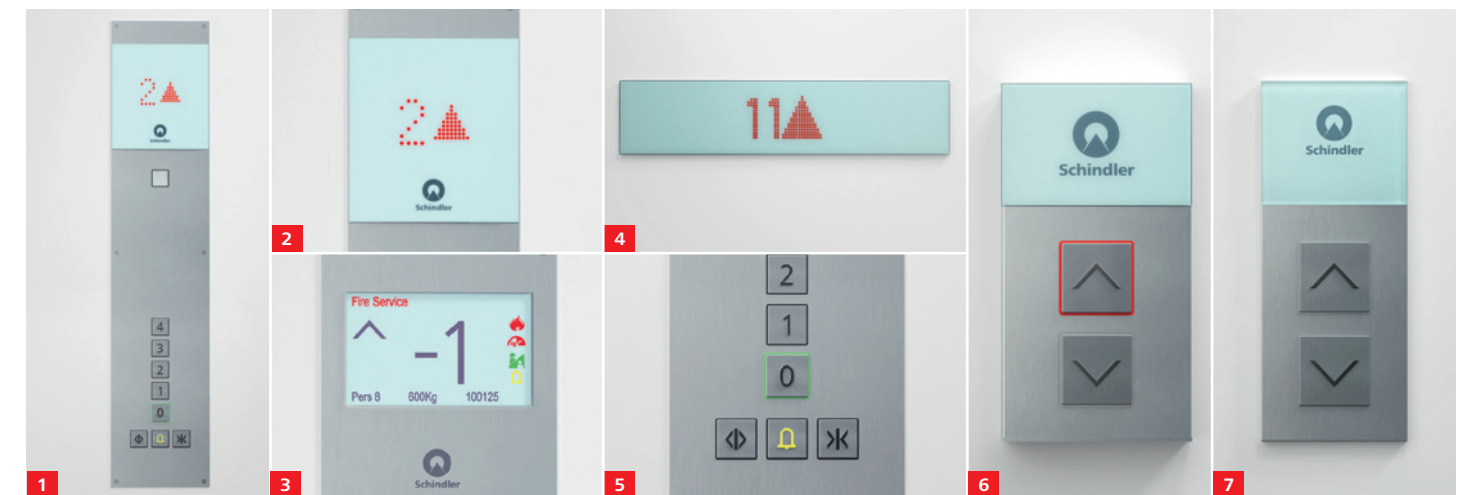

According to EN 81 20/50
New European standards

Advanced usability and a new look and feel

Why upgrade your elevator's fixtures?

The Schindler FI GS is the easy, effective way to give your elevator a new face and new functionality in combination with a new controller. Its elegant, modern design features a stainless steel front plate and glass-protected indicators. Combining sleek aesthetics

and the advanced functions now required by European regulations, it improves the experience of users and enhances the value of your building.

Comfort & Usability

Clarity and ease of operation make your elevator more user-friendly than ever before. Clear, multifunctional indicators in LED dot matrix or digital display, key switches, information lamps and a card reader interface are just some of the functions that work together to ensure maximum convenience. Increased safety and accessibility with options like braille script and communication to a 24-hour service centre.

Fast installation

Fast and easy to install anywhere - either flush or surface mounted - the Schindler FI GS panel can even be adapted to cover existing cutouts with precision. Ensuring almost no need for any building renovation work, this solution minimizes downtime and disturbance to users.

Key benefits

Elegant, modern design

Energy saving, lower operating costs

User-friendly operation

Complies with latest EU safety regulations

 Fast installation

Long lifetime

Technical data	
Construction	surface/flush mounting
Finish	hairline/mirror
Buttons	frameless, sandblasted, protruding symbols, LED confirmation, IPX3 protection
Attachment	flush (screw/clip), surface (screw)

Schindler Modernization

Schindler

Surface mounting

With its slightly protruding design, the surface-mounted format eliminates the need for cutouts to position the fixtures. What's more, they can be mounted on any material, either on the door frame or the wall. A fast and easy solution to modernize your elevator.

Car Operating Panel (COP)

- Push-buttons with red selection confirmation light
- Compliant with accessibility norm (EN81-70)
- Hairline or mirror stainless steel finish with white glass-covered indicator
- Optional car information panel (CIP) for floor designation
